

January 01, 2019 – December 31, 2019

TOTAL HOURS: 118:42:33

PROJECT	DURATION
CS 3250	118:42:33

TIME ENTRY	DURATION
Spike	23:35:00
Team meeting	8:29:43
Go through moodle to prepare for demo day	4:25:00
Opcode methods	4:07:16
Unit testing	3:45:56
Without description	3:08:50
Work on presentation	2:35:17
Work on powerpoint	2:34:55
Constant pool size	2:29:24
Unittest	2:19:34
Read the five dysfuntions of a team	2:18:20
Pool translate	2:18:14
Research struct	2:11:13
Help finalize presentation	2:10:14
switch to vscode	2:09:05
Parse bytecode	2:08:15

● Research pulling constant pool	2:05:56
● Group meeting	2:00:00
● Overflow and bipush	1:51:46
● Python functions for parsing constant pool	1:51:38
● Remove unused lines	1:47:00
● Constant pool methods	1:44:32
● parse constant pool	1:38:00
● Meeting with chris	1:37:00
● Unit test edge case	1:36:06
● Finalize presentation	1:35:37
● Discord meeting	1:34:41
● python list function	1:34:20
● More tag byte methods	1:32:27
● Integrating Travis CI	1:30:51
● Work with team on presentation	1:30:45
● Start 2nd sprint	1:26:39
● docstring to method	1:26:16
● work on remaining opcode methods	1:22:42
● Work on unit test	1:22:08
● Working with team for unittest	1:20:18
● Discord meeting with Chris and Bob to decipher code	1:20:06
● Team meeting (dynamic analysis)	1:18:12
● git branch	1:13:28
● unit test for new methods	1:13:11
● Convert bytecode to instructions	1:11:45
● Other time entries	9:10:53

PROJECT - TIME ENTRY

DURATION

● CS 3250	118:42:33
Checking email/downloading programs for CS	0:24:38
Clone github and edit python file	0:23:15
Clone repository through Ubuntu	0:08:14
Constant pool methods	1:44:32
Constant pool size	2:29:24

PROJECT - TIME ENTRY

DURATION

Convert bytecode to instructions	1:11:45
Discord meeting	1:34:41
Discord meeting with Chris and Bob to decipher code	1:20:06
Discord questions	0:50:17
docstring to method	1:26:16
Finalize presentation	1:35:37
git branch	1:13:28
Give up on ubuntu and wonder why I didn't start with BASH in windows 10	0:17:02
Go through moodle to prepare for demo day	4:25:00
Group meeting	2:00:00
Help finalize presentation	2:10:14
Install pip/coverage	0:12:51
Install Ubuntu	0:08:33
Integrating Travis CI	1:30:51
Learn about bytecode	1:11:08
Meeting with chris	1:37:00
More tag byte methods	1:32:27

PROJECT - TIME ENTRY

DURATION

Opcode methods	4:07:16
Overflow and bipush	1:51:46
Parse bytecode	2:08:15
parse constant pool	1:38:00
Pool translate	2:18:14
Python functions for parsing constant pool	1:51:38
python list function	1:34:20
Read SCRUM guide	0:45:42
Read the five dysfunctions of a team	2:18:20
Reading on stacks	0:29:26
Refactoring	1:01:46
Remove unused lines	1:47:00
Research	0:45:03
Research pulling constant pool	2:05:56
Research struct	2:11:13
Reviewing team changes	0:24:11
Setting up Python to work in Command Prompt	0:13:24

PROJECT - TIME ENTRY

DURATION

Setting up Toggl	0:02:13
Sign up for Moodle/Github/Slack/Travis	0:12:09
Spike	23:35:00
Start 2nd sprint	1:26:39
Start work on first github assignment	0:20:03
switch to vscode	2:09:05
Team meeting	8:29:43
Team meeting (dynamic analysis)	1:18:12
Try to understand how Bob pulled constant pool	0:57:00
Unit test edge case	1:36:06
unit test for new methods	1:13:11
Unit testing	3:45:56
Unittest	2:19:34
Watch an intro to Github https://www.youtube.com/watch?v=0fKg7e37bQE	0:23:58
Work on powerpoint	2:34:55
Work on presentation	2:35:17
work on remaining opcode methods	1:22:42

PROJECT - TIME ENTRY	DURATION
Work on unit test	1:22:08
Work with team on presentation	1:30:45
Working with team for unittest	1:20:18
Without description	3:08:50
