USER STORIES

As a user of JVPM:

- I want to implement 64-bit integers ("longs")
- I want to implement 32-bit IEEE 754 floating-point numbers.

STORY POINTS

Unit test for Float (4)

Unit test for Longs (4)

Method to read tag bytes for Float (2)

Method to read tag bytes for Longs (2)

Make method to convert the Hex to Float (5)

Make method to convert the Hex value to Long (9)

Pull .class method bytes properly. (8)

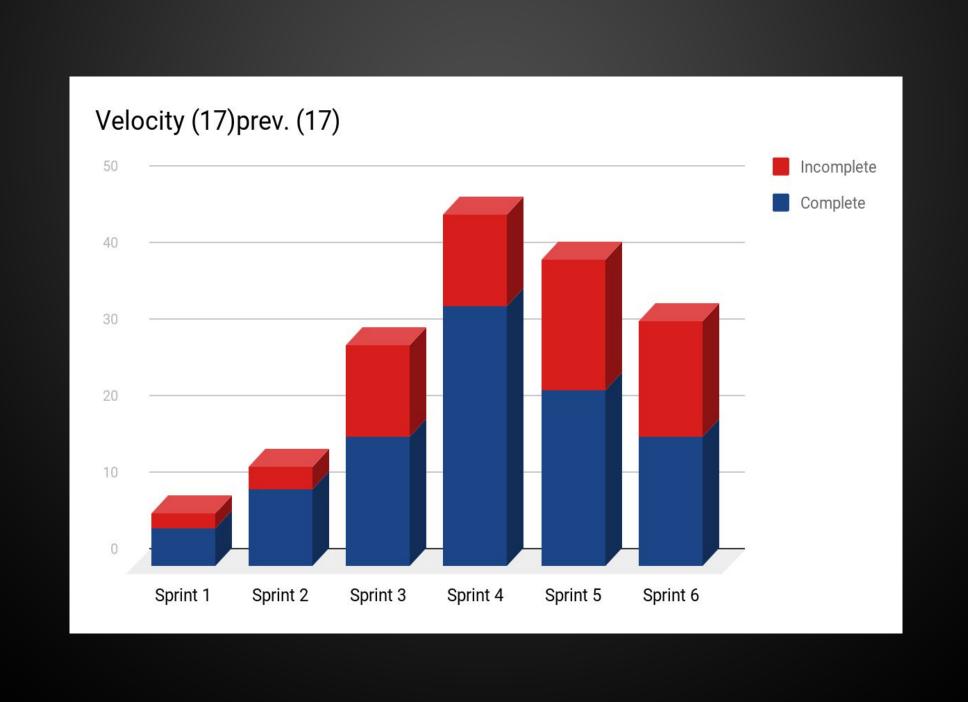

Clean up Constant Pool method. (1)

Incomplete:

- Opcode methods for floats(6)
- Opcode methods for longs(6)

DEMONSTRATION OF A RUNNING PROGRAM

SYSTEM DEVELOPMENT LIFE CYCLE STATISTICS

SDLC STATISTICS

Sprint Backlog (12)

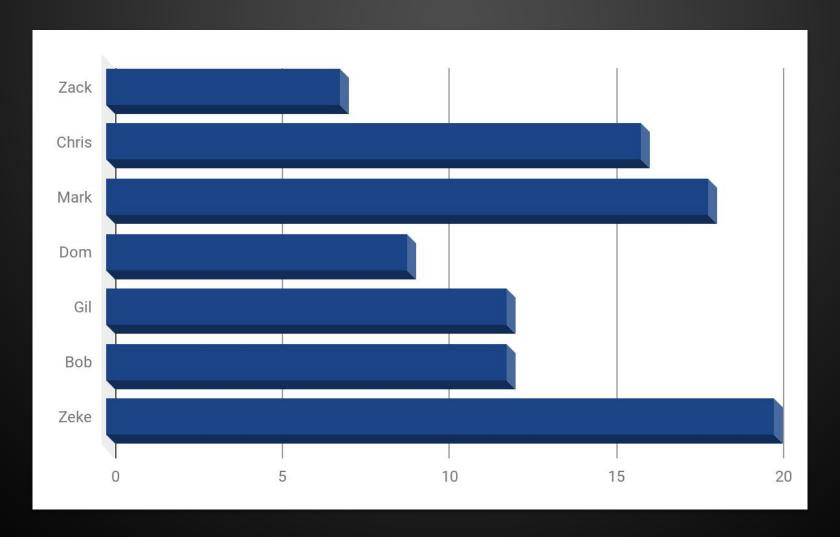

Opcode methods for Longs(6)

Opcode methods for Floats (6)

Project Backlog (11)

• Write the remaining Opcode methods.

Team Hours

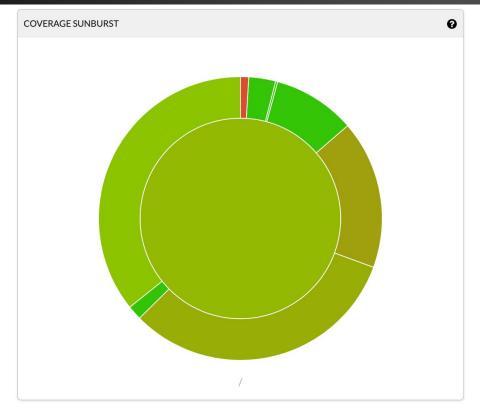

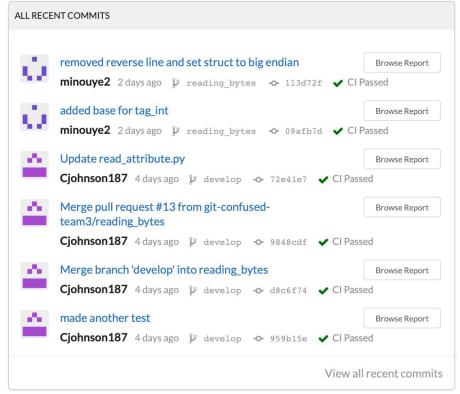

^{*}additional 8 hrs each for 2hr Mon & Wed team meetings.

Sprint Retrospective

WHAT WENT WELL

- Breaking down the user stories into story points
- Split workload more evenly between the Dev team.
- Worked on story points as a group.
- Break down the User Stories more evenly based on work needed to complete..

WHAT WENT POORLY

- Communication over the weekend.
- Implementing TDD.
- Didn't realize we had to write more opcode methods.

WHAT ARE WE GOING TO START/STOP/CONTINUE DOING

- Planning more efficiently.
- Break down the User Stories more evenly based on work needed to complete.
- Split workload more evenly between the Dev team.
- Continue our bi-weekly meetups.
